

Quietflex® Ductwork Earns GREENGUARD Certification, A Stringent 3rd Party Standard Designed to Improve IAQ

HOUSTON, March 25, 2009 – All Quietflex® brand flexible ductwork is now GREENGUARD Certified – an industry-independent certification designed to improve indoor air quality, the GREENGUARD Environmental Institute (GEI) announced today.

GREENGUARD Certification mark

The certification is significant for the Quietflex brand, which uses formaldehyde-free insulation in all its flex duct products, explains Ardee Toppe, Quietflex President. As part of the GREENGUARD CertificationSM Program, Quietflex flexible ductwork must meet stringent standards for low chemical emissions, with regular and rigorous testing and verification.

GREENGUARD Certification is broadly recognized and accepted by a number of "green" building programs, including the United States Green Building Council's (USGBC) LEED® program. The non-profit GREENGUARD organization is an ANSI Authorized Standards Developer, establishing acceptable indoor standards for indoor products environments and buildings.

"We are very proud to earn GREENGUARD Certification," explains Ardee Toppe, Quietflex President. "It's exciting that Quietflex brand products are not only GREENGUARD Certified, they are also manufactured with Johns Manville Formaldehyde-free™ insulation, unlike some of our competitors."

"The GREENGUARD Environmental Institute applauds Quietflex on its commitment to furthering our mission of improving indoor air quality," says Dr. Marilyn Black, Founder of GEI. "Products such as the formaldehyde-free, flexible ductwork are certified by the GREENGUARD Environmental Institute so that contractors, building owners and occupants can be assured that the products which they are buying are healthy for their indoor environments."

High-tech Amg Flex™ Duct interrupts growth of mold, bacteria to improve IAQ.

One Quietflex product that's now GREENGUARD Certified stands out as a technologically ground-breaking duct that can hinder the growth and accumulation of mold and bacteria, a significant contributor to potential IAQ problems. The inner core of the new AMG Flex™ duct features an active, anti-microbial coating made of silver that interrupts the growth cycle of microscopic molds and fungi.

Quietflex Earns GREENGUARD Certification

In addition to featuring Johns Manville Formaldehyde-free™ insulation, Quietflex ductwork is also made with galvanized wire, which is more resistant to corrosion than non-galvanized wire, a common material used by other duct manufacturers. A wide variety of Quietflex duct sizes are available, from 3-inch to 22-inch, and up to R-8 thicknesses.

All Quietflex products are backed with a five-year Limited Warranty. Locate a local Quietflex distributor at www.Quietflex.com, or call (877) 694-3669.

About Quietflex

Quietflex was founded in 1976 by an ambitious HVAC entrepreneur to meet the market demand for high-quality, affordable, flexible duct. It is the Quietflex mission to be the preferred provider of flexible duct to the HVAC industry and preferred supplier of niche fiberglass blanket applications. For more information about Quietflex ducts, duct liner, LNG tank insulation, semi-cured insulation for various molding applications, acoustical baffles and other various fiberglass blankets, visit <http://www.Quietflex.com>.

About GREENGUARD Environmental Institute (GEI)

Founded in 2001, GEI is an industry-independent, non-profit organization that oversees the GREENGUARD Certification ProgramSM. The Institute's mission is to protect human health and quality of life through programs that improve indoor air that people breathe. As an ANSI Accredited Standards Developer, GEI establishes acceptable indoor air standards for building materials, interior products, furnishings, electronic equipment, indoor environments and buildings. The more than 200,000 GREENGUARD Certified products must meet stringent; third-party standards for low chemical emissions based on established health standards and undergo rigorous testing and verification processes on a regular basis. GREENGUARD Certification is broadly recognized and accepted by a number of "green" building programs, including the United States Green Building Council's (USGBC) LEED program. An online guide to GREENGUARD Certified products is available at no charge at www.greenguard.org.
