

## **Quietflex® Launches HPDFlex™, a Formaldehyde-Free Flexible Duct for Commercial Installations**

-----  
*New flex duct offers wide static pressure range, oversized cores and the benefit of GREENGUARD Certification*

HOUSTON, October 5, 2009 – Quietflex® is introducing HPDFlex™, a formaldehyde-free flexible duct designed to meet the broad static pressure demands of commercial applications.

The new HPDFlex duct will achieve a negative static pressure rating of -2-inch w.c. and a positive static pressure rating of +16-inch w.c. That compares with Quietflex' residential flexible duct with a negative rating of +0.5-inch w.c. and a positive rating of +10-inch w.c.

All Quietflex flexible duct products, including the HPDFlex, feature Johns Manville Formaldehyde-free™ insulation and are GREENGUARD Certified – an industry-independent verification for products that can improve indoor air quality. Architects and contractors can spec Quietflex formaldehyde-free ducts to meet LEED® certification, a widely-adopted environmental standards program created by the United States Green Building Council (USGBC).

Oversized cores with galvanized wire in the HPDFlex duct increase reliability, performance and longevity. All Quietflex products are backed with a Five-year Limited Warranty.

In addition, Quietflex recently earned ISO 9001:2000 certification, considered an international benchmark for quality in manufacturing and design. Certification is conducted by Det Norske Veritas (DNV), an independent foundation with a mission statement of safeguarding life, property and the environment.

### **About Quietflex**

Quietflex was founded in 1976 by an ambitious HVAC entrepreneur to meet the market demand for high-quality, affordable, flexible duct. It is the Quietflex mission to be the preferred provider of flexible duct to the HVAC industry and preferred supplier of niche fiberglass blanket applications. For more information about Quietflex ducts, duct liner, LNG tank insulation, semi-cured insulation for various molding applications, acoustical baffles and other various fiberglass blankets, visit <http://www.Quietflex.com>.
