Section 1. Identification

GHS product identifier : Fiber Glass Insulation
Product code : Not available.
Other means of identification : Versatile Blanket, TexTuf Fiberglass Blanket, Regular G-Glass.
Product code : Not available.
Product type : Solid.

Identified uses
Fiberglass blanket applications for the automotive, natural gas, and construction industries. Thermal Insulation uses.

Supplier’s details
QuietFlex Manufacturing Company L.P.
4518 Brittmoore Rd.
Houston, Texas 77041
Tel : (713) 849-2163
Toll Free : 1-877-694-3669
Fax : (713) 849-0753
Web site: http://www.quietflex.com

Emergency telephone number (with hours of operation)
CANUTEC: +1-613-996-6666 or *666 (cellular)
CHEMTREC, U.S.: 1-800-424-9300 or International: +1-703-527-3887
24/7

Section 2. Hazards identification

OSHA/HCS status
This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture
SKIN CORROSION/IRRITATION - Category 2
SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3

GHS label elements

Hazard pictograms

Signal word
Warning

Hazard statements
H319 - Causes serious eye irritation.
H315 - Causes skin irritation.
H335 - May cause respiratory irritation.

Precautionary statements

Prevention
P280 - Wear protective gloves. Wear eye or face protection.
P271 - Use only outdoors or in a well-ventilated area.
P261 - Avoid breathing dust.
P264 - Wash hands thoroughly after handling.
Section 2. Hazards identification

Response:
P304 + P340 + P312 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.
P302 + P352 + P362+P364 - IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse.
P332 + P313 - IF skin irritation occurs: Get medical attention.
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313 - IF eye irritation persists: Get medical attention.

Storage:
P405 - Store locked up.

Disposal:
P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified (HNOC):
None known.

Section 3. Composition/information on ingredients

Substance/mixture: Mixture
Other means of identification: Versatile Blanket, TexTuf Fiberglass Blanket, Regular G-Glass.

CAS number/other identifiers

“Phenolic Novalac Resin / Hexamine” is thermoset into our insulation during our glass manufacturing process.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. Do not rub or scratch eyes. Dust particles may cause the eye to be scratched.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. Drink water to clear throat, and blow nose to remove dust. A saline spray in the nose may help clear any fibers. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact: Wash gently with soap and cool or room temperature water to remove dust and fibers. Get medical attention if symptoms occur.

Ingestion: Rinse out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. This material is not meant to be ingested. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects
### Section 4. First aid measures

| **Eye contact** | Dusts and fibers form of this product may cause temporary mechanical irritation to the eyes. |
| **Inhalation** | Dusts and fibers form of this product may cause temporary mechanical irritation to the nose, throat and respiratory track. |
| **Skin contact** | Dusts and fibers form of this product may cause temporary mechanical irritation and redness to the skin. |
| **Ingestion** | Ingestion of this product is unlikely; however, ingestion may cause gastrointestinal irritation. |

**Over-exposure signs/symptoms**

| **Eye contact** | Adverse symptoms may include the following: pain or irritation, watering, redness |
| **Inhalation** | Adverse symptoms may include the following: respiratory tract irritation, coughing |
| **Skin contact** | Adverse symptoms may include the following: irritation, redness |
| **Ingestion** | No known significant effects or critical hazards. |

**Indication of immediate medical attention and special treatment needed, if necessary**

| **Notes to physician** | In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| **Specific treatments** | No specific treatment. |
| **Protection of first-aiders** | No special protection is required. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

**Extinguishing media**

| **Suitable extinguishing media** | Use dry chemical, CO₂, water spray (fog) or foam. |
| **Unsuitable extinguishing media** | None known. |

**Specific hazards arising from the chemical**

| **Hazardous thermal decomposition products** | Decomposition products may include the following materials: Carbon dioxide, Carbon monoxide, Ammonia, Water |

**Special protective actions for fire-fighters**

| | Fire fighters should avoid inhaling any combustion products. |

**Special protective equipment for fire-fighters**

| | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel: Put on appropriate personal protective equipment.

For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions: Pick up large pieces and dispose as listed in Section 13 of this SDS.

Methods and materials for containment and cleaning up:

For non-emergency personnel:
- For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- Pick up large pieces. Vacuum dusts and loose fibers. If sweeping is necessary, use a dust suppressant such as water. Do not dry sweep dust. Never use compressed air for clean-up. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling:

Protective measures: Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene:
- Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.

Storage: Storage should be in accordance with packaging directions, if any. Material should be stored in a dry place and kept in its original packaging until use.

Conditions for safe storage, including any incompatibilities:
- Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep in original packaging until ready for use.

Section 8. Exposure controls/personal protection

Control parameters:

Occupational exposure limits: The Occupational Safety and Health Administration (OSHA) have not adopted specific exposure standards for fiber glass. Fiber glass is treated as a nuisance dust and is regulated by OSHA as a particulate not otherwise regulated (total dust) shown in CFR 1910.1000 Table Z-3.

Ingredient name | Exposure limits
--- | ---
Glass, oxide, chemicals | NIOSH REL (United States, 10/2016). TWA: 3 f/cc 10 hours. Form: Fibers of spec length TWA: 3 f/cc 10 hours. Form: Fibers of specific length TWA: 5 mg/m³ 10 hours. Form: Total ACGIH TLV (United States, 3/2017). TWA: 5 mg/m³ 8 hours. Form: Inhalable fraction TWA: 1 f/cc 8 hours. Form: Respirable fibers: length greater than 5 µm; aspect ratio equal to or greater than 3:1 as determined by the membrane filter method at 400-450X magnification (4-mm objective) phase contrast illumination.

Appropriate engineering controls: Good general ventilation should be sufficient to control worker exposure to airborne dust.

Environmental exposure controls: Pick up solid pieces and dispose of as listed in Section 13.
Section 8. Exposure controls/personal protection

**Individual protection measures**

**Hygiene measures**
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.

**Eye/face protection**
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. In dusty environments chemical goggles should be worn to protect against mechanical abrasion.

**Skin protection**

**Hand protection**
Cotton or leather gloves should be worn to protect against mechanical abrasion.

**Body protection**
Wear a cap, a loose-fitting long sleeved shirt and long pants to protect skin from mechanical irritation. Exposed skin areas should be washed with soap and water after handling or working with fiberglass.

**Other skin protection**
Clothing should be washed separately from other cloths, and the washer should be rinsed thoroughly (run empty for a wash cycle). This will help reduce the chances of fiber glass being transferred to other clothing.

**Respiratory protection**
A NIOSH approved N-95 series disposable respirator should be used if ventilation is unavailable, or is inadequate for keeping dust and fiber levels below applicable exposure limits referenced in Section 8 of this SDS.

Section 9. Physical and chemical properties

**Appearance**

**Physical state**
Solid. [Fibrous glass blanket.]

**Color**
Yellow to brown.

**Odor**
Organic (resin).

**pH**
Not applicable.

**Melting point**
Not available.

**Boiling point**
Not applicable.

**Flash point**
Not applicable.

**Evaporation rate**
Not applicable.

**Flammability (solid, gas)**
Non-flammable.

**Lower and upper explosive (flammable) limits**
Not available.

**Vapor pressure**
Not applicable.

**Vapor density**
Not applicable.

**Relative density**
Not applicable.

**Solubility**
Slight

**Partition coefficient: n-octanol/water**
Not available.

**Auto-ignition temperature**
Not available.

**Decomposition temperature**
Not available.

**Viscosity**
Not applicable.

**Volatility**
Not available.

**VOC (w/w)**
0 % (w/w)
Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable under normal conditions.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : None.

Incompatible materials : None.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity
There is no data available.

Irritation/Corrosion
Dust from this product is a mechanical irritant; which means that it may cause irritation or scratchiness of the throat and/or itching and redness of the eyes and skin.

Sensitization
There is no data available.

Carcinogenicity

Specific target organ toxicity (repeated exposure)
There is no data available.

Aspiration hazard
There is no data available.

Information on the likely routes of exposure : Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

Eye contact : Dusts and fibers form of this product may cause temporary mechanical irritation to the eyes.

Inhalation : Dusts and fibers form of this product may cause temporary mechanical irritation to the nose, throat and respiratory track.

Skin contact : Dusts and fibers form of this product may cause temporary mechanical irritation and redness to the skin.
Section 11. Toxicological information

Ingestion: Ingestion of this product is unlikely; however, ingestion may cause gastrointestinal irritation.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: Adverse symptoms may include the following:
- pain or irritation
- watering
- redness

Inhalation: Adverse symptoms may include the following:
- respiratory tract irritation
- coughing

Skin contact: Adverse symptoms may include the following:
- irritation
- redness

Ingestion: No known significant effects or critical hazards.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure
- Potential immediate effects: No known significant effects or critical hazards.
- Potential delayed effects: No known significant effects or critical hazards.

Long term exposure
- Potential immediate effects: No known significant effects or critical hazards.
- Potential delayed effects: No known significant effects or critical hazards.

Potential chronic health effects
- General: No known significant effects or critical hazards.
- Carcinogenicity: No known significant effects or critical hazards.
- Mutagenicity: No known significant effects or critical hazards.
- Teratogenicity: No known significant effects or critical hazards.
- Developmental effects: No known significant effects or critical hazards.
- Fertility effects: No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates
There is no data available.

Section 12. Ecological information

Toxicity
There is no data available.

Persistence and degradability
There is no data available.

Bioaccumulative potential
There is no data available.

Mobility in soil
Section 12. Ecological information

Soil/water partition coefficient ($K_{OC}$) : There is no data available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : This product is not expected to be a hazardous waste when it is disposed of according to the U.S. Environmental Protection Agency (EPA). Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Section 14. Transport information
